Flexible and semi-rigid films
for food packaging applications

FLEXIBLE AND SEMI-RIGID FILMS FOR FOOD PACKAGING APPLICATIONS

Each of Wipak's product brands represents a multitude of films with different features in terms of structure, gauge, barrier properties and sealing performance. Our films are highly esteemed by the processing industry and they are well suited for non-food applications, too.

The products listed in the table below provide an overview of Wipak's versatile product range.

<ul style="list-style-type: none"> ● Standard properties ○ Optional properties 		Thermoformable flexible films			Thermoformable semi-rigid films					
					Combi-therm	Superclear/ Nice	Multi-barrier & Combitherm XX	Multipet	Paper Bottom	Nice PP
		Coextruded film of polyamide with polyolefine and/or ionom sealing layer	Coextruded film of polyamide and polyolefine sealing layer	Coextruded film of polyamide with barrier layer and polyolefine and/or ionom sealing layer	Coextruded film of amorphous polyester and polyolefine sealing layer	Semi-rigid paper composite film	Coextruded film of polypropylene and polyolefine sealing layer

All packaging films comply with BGA and FDA requirements, and Normpack recommendations.

Wipak films meet the specific requirements of food products with properties such as:

- ▶ Aroma protection
- ▶ Barrier properties
- ▶ Printability
- ▶ Thermoformability
- ▶ Sealability

Typical applications for Wipak films include:

Fresh products like

- ▶ Meat and sausages
- ▶ Dairy products
- ▶ Poultry products
- ▶ Fish
- ▶ Ready-made meals

Dry food such as

- ▶ Bread and bakery products
- ▶ Pasta
- ▶ Coffee and tea
- ▶ Confectionery
- ▶ Long-life bakery products
- ▶ Spices
