

Steriking® CombiWraps

Combining the finest features of blue ProWrap SMX
and green NWGL wetlaid nonwoven

Extra protection

- CombiWraps are twice as tough as traditional wraps. Equipped with superior barrier properties, SMX ProWrap and green NWGL together give unbeatable protection against tearing and bacteria penetration.

No more leaks

- Together, blue ProWrap SMX and green NWGL secure the highest quality available in wrapping solutions. Furthermore, the nonwoven inner layer reduces wet loads significantly.

Cost efficiency

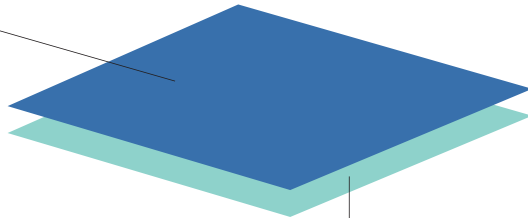

- No more extra costs caused by broken packages, plus you save both storage space and working time.

The blue and green

layers of the CombiWraps

Blue ProWrap SMX

- Extreme durability means less broken packages
- It drapes easily thus improving aseptic presentation

Green NWGL

- Excellent absorbency reduces wet loads
- Alcohol repellent – serves as a sterile field

Product range

Ref.	Material combination
CW5	SMX1 + NWGL
CW6	SMX2 + NWGL
CW7	SMX3 + NWGL
CW8	SMX4 + NWGL

Giving you double the benefits

- The interleaved combination sets a tortuous path for bacteria to penetrate.
- The combination of the blue and green sheets helps in detecting processing defects.
- Provides a color code – the outer wrap provides protection during transport and the inner wrap ensures sterility.
