

MLP

Excellent Mechanical Strength and Puncture Resistance

Ideal for:

Devices with sharp corners

STERILE EO

WIPAK is a member of Sterile Barrier Association

MLP

Excellent Mechanical Strength and Puncture Resistance

Material Composition

- PP / PA / PE
- Typical thickness range: 50-200 microns

Applications

- General thermoforming packaging material for medical devices
- Ideal for packaging devices with sharp corners
- Especially suitable for packaging of syringes, connectors, needles, catheters and tubings
- For EO gas sterilization
- Sealable and peelable with uncoated papers

Benefits

- Excellent formability
- Good cutting properties
- Very good runnability
- Outstanding clarity
- Non-curling due to symmetric structure
- Excellent mechanical strength and puncture resistance properties enable down-gauging with yield benefits

Wipak reserves right to make changes at any time without notice.
