

# MP TF Peel

Semi-rigid film to seal with uncoated Tyvek®

Ideal for:

High quality medical devices and replacing PVC

STERILE R EO

WIPAK is a member of the Sterile Barrier Association

# MP TF Peel

Semi-rigid film to seal with uncoated Tyvek®

## Material Composition

- APET/PE
- Typical thickness range: 200-750 microns

## Applications

- Suitable for the packaging of high quality medical devices requiring extra protection
- Especially for operation kits
- General thermoforming packaging material for medical devices
- For EO gas and irradiation sterilization

## Benefits

- Excellent protection for the device
- Improved production efficiency with faster sterilization cycle
- Better breathability of uncoated Tyvek® reduces risk of toxic EO residuals
- No risk from coated adhesive loose particles
- Savings in total packaging material cost
- Sustainable value (can be used to replace PVC)
