

Ideal for:

OCTASAFE

The Most Economical PA-based Forming Film

Wound care

IV Sets

Needles

Syringes

STERILE R EO

Wipak is a member of Sterile Barrier Association

OCTASAFE

The Most Economical PA-based Forming Film

Material composition

- PA/PE
- 8 layers
- Typical thickness range: 60–100 microns

Applications

- Suitable for packing of all common medical devices like syringes, needles, catheters, wound care etc.
- For EO gas and irradiation sterilization
- Sealable with uncoated papers, and also with coated top webs
- For all horizontal thermoform, fill and seal machines

Benefits

- Cost savings
- Down gauging
- Higher productivity and output
- Attractive packaging outlook
- No contamination risk due to stable structure
- Can be used as a printed top web
