

# PPAP

Non-curling thermoformable film for steam sterilization

Ideal for:

Steam sterilizable medical and surgical items

WIPAK is a member of Sterile Barrier Association

# PPAP

Non-curling thermoformable film for steam sterilization

## Material Composition

- PP / PA / PP
- Typical thickness range: 60 - 200 microns

## Applications

- General thermoforming packaging material for medical and surgical items
- For steam sterilization
- Sealable with un-coated medical papers and polymer top webs with appropriate sealing layer

## Benefits

- Strong film
- Non-curling due to symmetric structure
- Excellent mechanical strength and puncture resistance due to embedded polyamide

Wipak reserves right to make changes at any time without notice.
