

ADDED VALUE

Application & Technical Service

APPLICATION & TECHNICAL SERVICE

Creating Added value together!

Wipak customers can always rely on our know-how – from the first trial to the final product. Our service covers process consulting, packing trials, and processing of our films on the customer's system.

Technical service is both application support provided on site, but also an important driving force for film development. Our employees are in close contact with our customers so they are aware of urgent problems and can collaborate with the Wipak Development, Production and Sales specialists to work out customized solutions.

Our Service (selection)

- ▶ Application support & consulting
- ▶ Analysis and optimization of packaging processes
- ▶ Production of sample packages and prototypes
- ▶ Simulation of packaging processes at the Wipak Solution Center
- ▶ Technical support before and after the first use of our films on your systems
- ▶ Technical support for the introduction of new or modified films
- ▶ Analysis and elimination of disturbances
- ▶ Adaptation and modification of machine tools

Our mission: Optimizing your processes

- ▶ Increase of machine performance and utilization
- ▶ Smooth processing on your systems
- ▶ High efficiency and reduction of scrap rate
- ▶ Motivated team with expertise in systems engineering, film technology and process optimization
- ▶ Short downtimes due to fast and flexible on-site service

Close contact to customers included – worldwide!

Technicians and engineers, all of them film and packaging technology experts, provide consulting services to Wipak customers all over the world for all questions concerning the application of films and the optimization of your packaging processes.

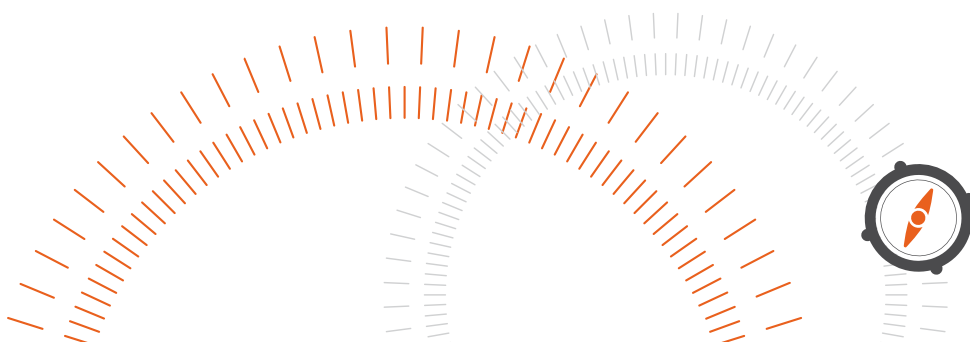

Application support and consulting – Individual support instead of bog standard

Our team is familiar with the production environment of our customers, they know the products in depth, and they have extensive background knowledge on machine technology. This allows our employees to quickly find ideal solutions.

Analyzing processes – optimizing processing

Technical service also includes analyzing packaging processes on customer site and simulating the further processing of our films at the Wipak Solution Center.

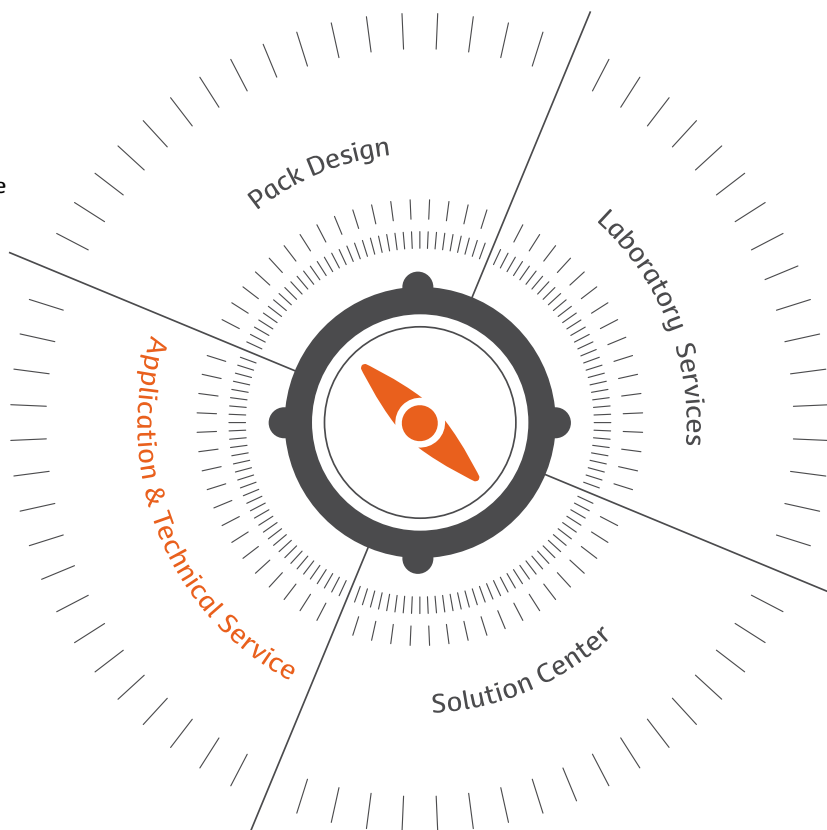

Based on a process-oriented approach and on our cooperation with leading machine manufacturers, we are able to systematically optimize processing conditions and to ideally match systems and films. This way we can find quickly effective solutions, thus reducing outages and downtimes to a minimum.

WIPAK Partner in Packaging

The Wipak Group develops and produces sophisticated packaging solutions for food products as well as for medical instruments and devices. Part of the Finnish Wihuri Group, Wipak has acquired a leading position for multi-layer films in Europe – in particular for barrier films. Comprehensive services – from pack design to technical training – are important factors of our success, making sure that our products support our customers to create added value.
